CS Electronics [UK] Ltd Environmental Policy November 2021

CS Electronics [UK] Ltd is a firm believer that each business is responsible for achieving good environmental practices and operating in a sustainable manner.

We are committed to reducing our environmental impact/footprint on our planet and will continually improve our environmental performance as an integral and fundamental part of our business strategy and operating methods throughout.

We make it our priority to encourage all our customers, suppliers, and all business associates to follow suit.

Commercially, it makes sense for all; it is a matter of passing on our duty of care towards our future generations.

Our policy is to:

- ❖ Support and comply with, or exceed the requirements of, the current environmental legislation and codes of practice.
- ❖ Reuse or recycle to minimise our waste as much as possible.
- ❖ Conserve energy and water usage in our buildings, vehicles, and processes to save supplies, and effectively reduce our consumption of natural resources, especially where they are non-renewable.
- ❖ Maintain/operate all company vehicles (where appropriate) with due regard to environmental issues as far as being reasonably practical and encourage the use of alternative methods of transport and car sharing as appropriate and where possible.
- ❖ Apply continuous improvement in respect of air, water, noise, and light pollution from our premises and reduce any impacts from our operations on the environment and local community.
- ❖ Where we can, purchase products and services that do the least damage to the environment and encourage our contacts to do this as standard practice.

CS ELECTRONICS

PRINTED CIRCUITS ▪ IMS ▪ MULTILAYER

- ❖ For new processes or products assess the environmental impact of these beforehand.
